

niroflex USA

Introducing

niroflex mesh glove tensioners

Even though our mesh gloves are the most ergonomically correct mesh gloves in the world, the loose nature of ring mesh can still be a challenge for proper fit. We now offer a simple, sanitary polymeric mesh glove tensioner that fits over the mesh glove on the back of the hand and provides a tighter fit for the working area of the palm and fingers without hindering comfort or dexterity.

Catalog item GS-100 – packed and sold per package of 100 tensioners.
